

COMPANY PROFILE

Sustainable mobility, made for Africa

Electric vehicles, charging and fleet technology for Nigeria's riders, businesses and governments.

2026 · Lagos · Abuja · Port Harcourt and across Nigeria

WHO WE ARE

A Nigerian company powering Africa's move to electric mobility

Vision

To power Africa's transition to sustainable mobility with affordable, efficient electric vehicle solutions that fit local economies and infrastructure.

Mission

We design, source and deploy electric vehicles, charging and energy technology built for African roads, climate and power conditions.

Registered name

VoltAfrica Mobility Limited

Registration

RC 8855924

Footprint

**Lagos, Abuja, Port Harcourt and
Nigeria's other major cities**

Focus

**Electric vehicle solutions and
automobile engineering**

WHY NIGERIA, WHY NOW

The case for electric transport has never been stronger

₦1,355+

per litre of petrol in October 2026, the main cost for every driver and rider

200M+

people, with Lagos among Africa's busiest mobility hubs

Policy

tax and import measures that now favour electric vehicles

ECOWAS

Nigeria as the gateway to West Africa's electric vehicle market

Petrol price: Lagos pump price, October 2026.

WHAT WE DO

One integrated value chain, from vehicle to battery's second life

Vehicles

Motorcycles, tricycles, cars and minibuses, moving toward local assembly

Charging

Solar-backed charging and battery swapping in cities and along corridors

Energy and batteries

Battery assembly, recycling and second-life storage

Fleet services

Telematics, leasing and managed fleets for business and government

Skills and R&D

Training and innovation with Nigerian universities and polytechnics

Owning more of the chain lets us lower costs, adapt products to local conditions and keep vehicles running long after delivery.

OUR SOLUTIONS

Four ways we put electric mobility to work

MOVE

Vehicle supply

Electric motorcycles and tricycles sourced, imported, cleared and delivered to site

FLEET

Corporate fleets

Electric cars, SUVs and minibuses with charging, servicing and leasing options

CONNECT

Fleet intelligence

Tracking, battery charge, energy cost per km and alerts on one dashboard

REPORT

Impact reporting

Monthly reports on users served, savings, emissions avoided and jobs

WHO WE SERVE

Built for the people who keep Nigeria moving

Government programmes

State and agency programmes
with full procurement records

Corporate fleets

Staff, executive and shuttle
vehicles with charging at your
premises

Riders and logistics

Commercial motorcycles and
tricycles for passengers and
deliveries

Transport operators

Electric minibuses and charging
for public and private transport

HOW WE WORK

One accountable partner, from first survey to monthly report

01

Assess

Survey routes, users, power supply and sites

02

Design

Choose vehicles, charging and a costed plan

03

Source

Order, import, certify and clear every unit

04

Deploy

Install charging, train users, hand over

05

Support

Service, monitor and report every month

LET'S TALK

Electric. African. Possible.

Tell us what you need to move, and we will show you how to move it on electricity.
